

granite

SatinStone™ is the natural stone alternative to polished quartz with the advantages of its greater stain, UV, and heat resistance. It's permanently sealed and re-sealing is not necessary or recommended. The SatinStone™ Granite Collection offers a full 5-year limited warranty and is available in a gloss, satin, or suede finish.

Can SatinStone™ Granite be stained? All products, including quartz and natural stone, can be stained. There is no such thing as a stain-proof countertop. However, SatinStone™ is highly stain resistant and outperforms quartz products.

How easy is it to maintain? Soap and water are all that's usually necessary for cleaning. Re-sealing is not necessary and is not recommended. An occasional application of Lemon Clean Pledge may be used to restore water beading and luster to your countertops.

Is it heat resistant? The SatinStone™ Granite Collection is extremely heat resistant and can be used as a surround for a wood or gas burning fireplace.

Can it be used outdoors? Yes! SatinStone™ Granites can be used outdoors if the resin that is used at the factory has been removed thru the brushing process. Some granites have deep voids which are filled with resin which can not be totally removed. However, while many granite options in the suede finish are suited for outdoors, some will change colors under direct prolonged direct exposure to UV rays. It is best to consult with your dealer as to which options work well outdoor.

Can any granite be converted into a SatinStone™ product? Yes! Any granite product can be honed and then permanently sealed with SatinStone's™ proprietary sealing system. The process enhances the color and light reflection of the honed and sealed surface. All SatinStone™ Granite surfaces also comes with a full 5-year limited warranty.
